

## ARTISAN MAKERS

If you're after interior accessories with an eco-friendly edge, check out the latest from Oggetto, an online store showcasing small-scale manufacturers from around the world. All of its simple, stylish products are made by hand, using sustainably sourced materials, so it's a great way to support traditional, fair-trade crafts while giving your home a personal feel. The new collection includes woven baskets from Tanzania, £20-£60, and pure, undyed Shetland wool throws. (01305 881 010; oggetto.com)

We can't wait to see CaSA Architects' latest project in the flesh, after its bold design won Paragraph 55 planning permission earlier this year. The new development, in parkland beside a listed farmhouse just outside Frome, Somerset, combines passive house principles with an innovative layout and natural materials that reflect the surrounding woodland and nearby farm buildings.
